How Spine Tone Works

Apply the oil on your scalp and leave it there for at least 30 minutes. The bio-active components will reverse the inflammations of the joints. It will also reverse the impingement of the nerves, leading to pain relief. The impingement of nerve endings is a major reason for unbearable pain in the neck and joints.

The bio-active components also regenerate the degenerated tissues – mainly ligaments and cartilage. Thus, the harmful effects of degeneration of ligaments are mitigated. This relieves the nerve endings trapped between the bones. This relieves the severe pain caused due to impingement of nerve endings.

Within a few weeks of using Spine Tone, you will experience better gait, freedom from weak arms & legs, and a healthy neck. You will not feel any pain in your neck or shoulders. You can walk steadily without feeling severe pain in your neck, shoulders, and other joints.

Spine Tone is a herbal combination and contains no chemicals. The following herbs are used.

- Sida indica
- Merremia tridentate
- Terminalia arjuna
- Alipinia galangal
- Nardostachys jatamansi
- Veteria indica
- Virgin coconut oil

While the ingredients strengthen and regenerate the spine, ligaments, and cartilage, the virgin coconut oil acts as a vehicle that takes the components deep into the skeletal system.

How to Use Spine Tone

Gently massage a few drops of this herbal oil on to your scalp and leave it there for 30 minutes. If possible, do this twice a day for faster and better results. In other words, apply this oil on your scalp 30 minutes prior to taking a shower. However, don't use strong shampoos to wash the oil away. Mild shampoo is OK.
