ABOUT CELLULITECLEAR

Cellulite is a cosmetic skin defect of female, especially of their private areas like thighs, buttocks and hip. The skin looks lumpy and dimpled. Cellulite occurs in 90% of most post-pubescent women. This has a negative sex appeal factor.

Descriptive names for cellulite include orange peel syndrome, cottage cheese skin, the mattress phenomenon, and hail damage. It is rarely seen in males. Cellulite is not related to being overweight; average and underweight people also get cellulite.

How it occurs

Cellulite commonly appears on the thighs, buttocks and hips but is not caused by being overweight, as many believe. Cellulite appears in the subcutaneous level of skin tissue. Fat cells are arranged in chambers surrounded by bands of connective tissue called septae. As water is retained, fat cells held within the perimeters of this area expand and stretch the connective tissue. Eventually this connective tissue contracts and hardens (sclerosis) holding the skin at a non-flexible length, while the surrounding tissue continues to expand with weight, or water gain. This results in areas of the skin being held down while other sections bulge outward, resulting in the lumpy, 'cottage-cheese' appearance.

What are the symptoms?

- Lumps and bumps around thighs, hips, and love handles
- Trapped waste and fluid in pockets beneath the skin.
- There may be soreness and tenderness when the skin is massaged.

Other effective remedy for cellulite?

Liposuction, massage, weight reduction techniques, and surgery - all are not ideally not effective.

CELLULITECLEAR TRADITIONAL INDICATIONS

1. Adiposis edematosa
2. Dermopanniculosis deformans
3. Status protrusus cutis
4. Gynoid lipodystrophy

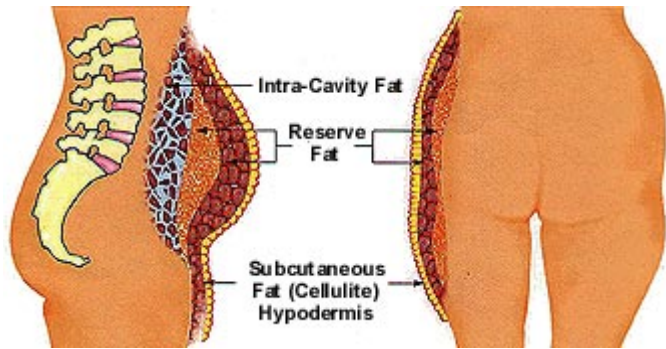

Cellulite describes dimpling of skin, caused by the protrusion of subcutaneous fat into the dermis creating an undulating dermal-subcutaneous fat junction adipose tissue that is commonly found on the thighs, stomach, and butt. The term cellulite originated in France more than 150 years ago. Descriptive names for cellulite include orange peel syndrome, cottage cheese skin, the mattress phenomenon, and hail damage. Cellulite is actually a fancy name for collections of fat that push against the connective tissue beneath a person's skin, which causes the surface of the skin to

dimple or pucker like the surface of an orange peel.

How it works?

Our 100% natural herbal food supplement **CELLULITECLEAR** helps your system to work in 3 different ways;

1. The subcutaneous fat is selectively mobilized for burning to release energy. This reduces the undue tissue tension inside the septal chambers.

2. The sclerosed connective tissue bands are repaired by laying parallel fibers of new collagen.

This gives back its stretching tensile strength. So the dimples disappear.

3. The extra overloading of water is reduced as total hormonal axis is balanced that includes aldosterone and estrogen-progesterone.

To summarize, the basic pathology of cellulite formation in women can be easily reversible with the help of the **CELLULITECLEAR** herbal food supplement.

Hello sir,

I am Susan Millsaps 33 yrs old from England. Seven months back I bought **CELLULITECLEAR** from your online store for my cellulite problem. I had very bad time at my family due to my cellulite problem. My husband is very concerned about my body. He was very upset with me when the cellulite re-appeared after

a costly liposuction he spent for me. I was sure he might have divorced me as I noticed his disinterest unlike before. **CELLULITECLEAR** is really a great product - I am daring enough to say so, as it saved my future. The doctor who did my liposuction told me that the recurrence of cellulite is causing by the hormonal imbalance in my body and he was unable to help me for the same. In that frustrated situation I was frantically searched for an alternate treatment. I thank God for bringing me to your website. Anyhow, now I am

the happiest wife to be free from the incurable cellulite. Thank you very much and I am going to continue **CELLULITECLEAR** for some more time.

Few months before I started **CELLULITECLEAR** recommended by one of my friends who used the same. I am a swimming athlete and now a trainer, 40 years old. Because of dimples and bumpy looks at my thighs, I restricted me to be in the pool with swimming costume. It was uncomfortable as friends commented often. The term cellulite I learned after I got it myself in spite I am an athlete. I was disappointed learning that no definite or effective remedy is available for cellulite. I was sure to loose my career as a trainer.

Meanwhile my friend who suggested **CELLULITECLEAR** has given me your website address. I looked at your website but I never expected such a result. I placed the order only because to please my friend as she was strongly recommending.

After few months time I was thrilled to inform the result to her but she was not surprised as she had recommended **CELLULITECLEAR** to few other friends who had similar results. Now I am convinced and happy to announce the world that **CELLULITECLEAR** is the best for cellulite

treatment.

I trust all of your products and believe that you have a collection of best products. My husband was suffering from cholesterol and high blood pressure since he was 40 years old. He also had few varicose veins. After 3 months of **VASKO** his cholesterol dropped to normal and his varicose veins disappeared. Now after a long years time again he is wearing shorts for his morning walk.

I am so happy and I love Ayurvedanta!!!
