

## VEINISH

### TRADITIONAL INDICATIONS

1. Spider Veins
2. Peripheral Vascular disorders (T.A.O or Burger's Disease)
3. Pedal Edema - Swelling of the feet and ankles caused by collection of fluid in the tissues.
4. Thrombophlebitis - (throm-bo-fluh-BI-tis), a small blood clot formed inside the lumen of a vein, causing a block in the venous flow and hence swelling down.
5. Systemic Hypertension (essential)
6. **Brain Diseases**  
Dementia  
Cerebrovascular insufficiency states  
Alzheimer's disease  
Parkinson's disease  
Epilepsy
7. **Skin Diseases**  
Eczema of lower limbs.  
Scleroderma  
Psoriasis  
Vitiligo
8. Diabetic Retinopathy

How it works: -

While taking the food supplements **VEINISH** with **VASKO**, it helps Venous and arterial endothelial fatty deposits dissolved and the damaged valves in veins (failed to hold the blood leaking backwards) get repaired to regain the tensile strength. Fresh collagen fibers are laid down parallel to the old ones and new connective tissue is formed in the valves. The new endothelium grown will contribute the strength enough to have sufficient tensile strength to hold venous blood at compartments against the gravity. In arteries also repair of the endothelium after dissolving the fatty deposits is happening. The same way in lower limb arterial narrowing (Burger's Disease) that ends in gangrene is also reversible with help of **VEINISH** with **VASKO**.

**VEINISH** and **VASKO** is a non-invasive and safer way compared to the surgical stripping off the varicose vein treatment or modern treatment of intravenous lacer therapy.

**VEINISH** improves the blood perfusion to the brain as it regains the healthy endothelium of vessels to increase its nitric oxide output. This paves the way to increase neuronal metabolism and balanced neurotransmitter state. That helps reversal of brain degenerative diseases like dementia, Alzheimer's and Parkinson's diseases.

**VEINISH** helps to improvise the skin health by stimulating new Glycosaminoglycans and collagen in the layers. And also stimulates immunity with augmented blood perfusion to the skin layers. Once venous flow improves, dependant eczema reverses. This effect helps reversing chronic eczema and scleroderma. Moreover, it helps for wound healing with good quality scar formation in the varicose ulcer and eczematous ulcers.

**Side effects:** - There are no known side effects.

**Recommendations:** We recommend taking **VEINISH** along with **VASKO** for best result.

## ABOUT VEINISH

**VEINISH** is an Ayurvedic preparation that has been used for more than 250 years and time tested by Chavarcodes Ayurvedic physicians. **VEINISH** has been used for generations and by thousands of people. This natural herbal formula is made without any added chemicals or preservatives.

**VEINISH** is a holistic herbal formula that works at so many levels and helps many diseases at the same time by enhancing your own system.

Varicose veins of lower limbs are very common in older people, especially in women. In the modern medicine, there is no effective therapy available so far except stripping of the veins surgically and Sclerotherapy, Laser surgeries, Catheter-assisted procedures and Ambulatory phlebectomy etc.

The venous system of legs suffers gravitational pooling of blood and its antigravity strain on the vein walls. This can cause damage to its vessel wall and valves, resulting in tortuous varicose veins. **VEINISH** has the properties to help reverse the said venous changes. Venous thrombosis associated with inflammation of its intimal layer (thrombo-phlebitis) is reversible. Moreover pedal edema disappears once the venous insufficiency is corrected. Best results for varicose veins, it is recommended to take **VASKO** along with **VEINISH**.

**VEINISH** sharpens memory and concentration. The neuronal activity is enhanced as **VEINISH** improves blood circulation in the brain. This helps reversal / prevention of neuronal dysfunctions like dementia, Parkinson's and Alzheimer's disease, Epilepsy etc.

**VEINISH** has positive skin effects. It augments blood perfusion in all layers. Immunoglobulin secretion is more and so infections are kept away. The pigmentation and elasticity of skin is regained to normal. Any ulceration of skin is easily healed with **VEINISH**.

**VEINISH** can reverse systemic high blood pressure as it relaxes the smooth muscles of arterioles and regains elasticity of the hardened vessels by laying new collagen to the walls.

### DOSAGE and DIRECTIONS

1 Capsule every 12 hours at empty stomach with lukewarm water alone with **VASKO**. Take food after 45 minutes for best result.

**VEINISH** works with our herbal supplement **VASKO** for better result. We recommend **VEINISH** should be taken alone with **VASKO**. Take optimum water to enhance elimination of released metabolic toxins from the body.

### INGREDIENTS

<b>Supplement Facts</b>		
Serving Size: 1 Capsule (500 mg )		
Servings per container: 60		
Each Serving contains		%DV
Centella Asiatica	200 mg.	*
Embllica Officinalis	100 mg.	*
Hemidesmus Indicus	100 mg.	*
Curcuma Longa	100 mg.	*
* Daily value (DV) not established.		

**1) Centella Asiatica** also known as centella and Indian Pennywort, is a creeping vine found growing in tropical and subtropical climates. It has been used for thousands of years in Ayurvedic medicine to improve memory and maintain a healthy central nervous system, and recent clinical studies support this tradition. When blood vessels lose their elasticity, blood pools in the legs and fluid leaks out of the blood vessels, causing the legs to swell (venous insufficiency). In a study of 94 people with venous insufficiency, those who took centella reported a significant improvement in symptoms compared to those who took placebo. In another study of people with varicose veins, ultrasound examination revealed improvements in the vascular tone of those who took this herb.

Centella protects the blood vessels that supply oxygen to the brain, which helps increase the brain's oxygen supply. Clinical studies have shown that this improves concentration; in one study students test scores improved after taking centella. This plant has also been shown to have a calming effect on individuals prone to anxiety, and may also be useful in individuals suffering from depression.

Studies suggest that centella can be an effective treatment for other skin disorders as well. In one study, participants suffering from scleroderma (a condition that causes tissues to harden) reported that taking 20 milligrams of centella asiatica extract three times a week made their joints and skin more flexible.

Glycosaminoglycans are also needed to strengthen the connective tissue that surrounds the veins of the legs, and numerous studies have shown that this herb is an effective treatment for leg pain and swelling in people that suffer from varicose veins and chronic venous insufficiency (CVI). Additionally, studies have shown that centella lowers blood pressure, which may be helpful to both people with CVI and people struggling with high blood pressure.

**2) Emblica Officinalis** is known for its abundant vitamin C that is held to withstand even at high degrees temperatures. The role of vitamin c in the collagen formation is inevitable. The abundant tannins in this fruit protect the stomach and liver. The micronutrients like zinc, chromium, ferrous iron, and phosphorus are essential for vibrant health.

**3) Hemidesmus Indicus** roots contain essential oils, coumarin, glycosides, tannins and resins. The phytosterols gives skin a cooling effect and immunocompetence. It is soothing to brain and gives relaxing effect. Blood pressure lowering is an added effect.

**4) Curcuma Longa** - The yellow pigment in the rhizome has abundant anti-oxidants and bio-flavones. It is anti-cancer and is important in the brain neuronal metabolism. It can help the liver in detoxification. Curcumin is the major ingredient.

## TESTIMONIALS

### VARICOSE VAIN AND HIGH BLOOD PRESSURE

I am a 42 year old female. I suffer from high blood pressure and very bad varicose veins in both of my legs. I've been on medication for high blood pressure for years my blood pressure has been under control because of it but the side effects are horrible, not to mention the damage this is all doing to my liver. My varicose veins have never gotten better despite several meds I've taken. As a matter of fact they have continued to get worse and more painful. My Doctor advised me to have surgery to "Strip the veins" and remove them. Just the thought of it is terrifying. I kept putting it off because I know people that have had this done and they don't sedate you. I've heard that it's very painful. One of my relatives advised to try **VASKO** and **VEINISH**, are all natural product. So I went to the internet and ordered a 3 month supply and started taking it immediately. Three weeks later I noticed my varicose veins started disappearing. It was unbelievable! After 2 months I had my blood work done and my doctor asked me what I had done differently to bring my high blood pressure back to normal? I told him about **VASKO** and how much it had helped me. The second month on your product, the swelling in my feet and legs were gone. I was able to wear my shoes again. It is 3 months later now and I'm still taking your product. My doctor advised me to stop taking my

prescription high blood pressure medication because I no longer need it thanks to you. Now I can walk freely and stand for long periods of time with no problem. Thank you and your company for this wonderful herbal product. It has really changed my life. It has saved me from the surgery that I was so afraid of. I am still taking **VASKO** and **VEINISH** because I don't want to have to take any more prescription medicine or ever need to have surgery on my veins. Thank you so much!

#### BLOCKED ARTERY

I was diagnosed with Coronary artery blockage and I was very scared. My Blood cholesterol triglycerides were very high. I have had problems walking for a long time because I was short of breath. I was told by my doctor that I needed bypass surgery after my results came back from an angiogram. I immediately began my search for an alternative to the bypass surgery. My close friend had been telling me for some time about your herbal supplement **VASKO** but I wasn't sure what to make of it and had always been skeptical of non prescription meds. He strongly recommended it to me so many times that when I started searching for alternatives I thought of your product right away. I had nothing to lose. I placed an order and had it shipped the fastest way possible. On the website I also read about another product you offer called **VEINISH**. The site specifically stated that it helps to unblock any blocked arteries. I had an email consultation with the herbalist at the website and he recommended that I take both **VEINISH** and **VASKO** together for a trial period of three months.

Within 3 weeks of taking both supplements, I noticed a lot of changes in my overall health. I suddenly had the strength to walk much better and for longer periods of time than I had been able in a very long time. I could even handle staircases, which I could not believe, without symptoms. I was getting better day by day. I placed another 3 month order right away , after realizing how much this product was helping me

I really cannot believe I am saying this but, now that your products are part of my daily life, I do not experience any discomfort, chest pain or breathing difficulty at all. It is just baffling to me. After 6 months when I went to my doctor for a checkup, the doctor was just astonished at my improvement. The results of my blood work were 90% normal. The doctor was speechless! The bad cholesterol had gone way down, and the good cholesterol had gone way up. My Triglycerides were actually normal! I don't know what to say. How

can I possibly express my gratitude to you for saving my life?

My doctor wants to do another angiogram to be sure but I told him to wait for another 3 months. I plan on continuing **VASKO** and **VEINISH** and then having my follow up angiogram after an additional 3 months on your products.

The herbs you supplied are well worth the money I paid and more. There is really no way of putting a value on what you've done for me. I am so grateful! I will be a lifelong customer and recommend you to everyone I know. I don't think I will ever be in danger of having bypass surgery again thanks to you.

### VARICOSE VEIN

I am a 43 yrs old woman with terrible, large bulging varicose veins in my right leg and smaller ones, as well as spider veins all over my left leg. My doctor suggested laser surgery, as it was the only treatment he knew to work.

My friend at the office told me that her neighbor had the same condition and cured it totally without surgery, using an herbal formula that she bought online. The next day she gave me the website address and we checked it out together in the office. I contacted the company and spoke to your herbalist. He advised me to take **VEINISH** and **VASKO** for a six month period of time. Initially I was a bit skeptical and wanted to see the result before I ordered that much of it. So I tried a 3 month supply at first. I ordered both herbal supplements.

After 2 weeks, this stuff blew me away! I thought I was seeing things. The huge painful veins were just disappearing. I really could NOT believe it. I then placed my second order for another 3 months. By the end of the next 3 months on your supplements, there were barely any visible marks or any evidence of the bulging veins that were once there. However, the herbalist was right when he said that the spider veins would take longer to vanish. So I am still taking **VENISH** and **VASKO** as the company herbalist advised.

These herbs are really marvelous! I have recommended them to many of my female friends and relatives with the same problem. This company has many miraculous supplements and I come here now for any health issue that I have. I feel better than I ever have in my whole life!

## HEALING CRISIS

The healing crisis is a process in which the body undergoes an intense period of cleansing and rebuilding. It is called a "healing" crisis because the body is healing and becoming stronger. It is referred to as a "crisis" because the symptoms can be dramatic and rather unpleasant during this time. Because the healing crisis is accompanied by unpleasant symptoms it is often mistaken as a sickness. Common symptoms include nausea, diarrhea, sinus congestion, muscle aches and pains, headache and fatigue. The crisis generally lasts only a day or two. In reality, it is just the opposite. It is a process in which the body is overcoming ill health and becoming healthier and stronger.

**Side effects:** - There are no known side effects.
